Sem/year: 2<sup>nd</sup> Lesson Plan for: BIOCHEMISTRY & CLINICAL PATHOLOGY Branch: D. PHARMACY

| S.No | Month     | Week Dat | e Name of Chapter                  | Contents to be Taught   | Remarks |
|------|-----------|----------|------------------------------------|---|---------|
| 1    | August    | 07/08    | 23 Introduction to<br>biochemistry | Scope of biochemistry in pharmacy   |         |
|      |           | 09/08,   | 123.                               | Cell and its biochemical<br>organization  |         |
| 2    |           | 19/08    |                                    | Definition, classification with<br>examples, chemical properties  |         |
|      |           | ,        | /23 Monosaccharide's               | Structure of glucose, fructose and galactose  |         |
|      | Syptember | 04/09    | 23. Disaccharides                  | Structure of maltose, lactose and sucrose   |         |
|      |           | 06/09/   | /23. Polysaccharides               | Chemical nature of starch and glycogen  |         |
|      |           | 11/01/   |                                    | Qualitative test and biological role of carbohydrates   |         |
|      |           | 13/09    | /23                                | Test  |         |
| 3    |           | 19/09/   | 23. Proteins                       | Definition, classification of<br>proteins based on composition<br>and solubility with example                         |         |
|      |           | 23/09/   | 23.                                | Definition, classification of<br>amino acid based on chemical<br>nature and nutritional<br>requirements with examples |         |
|      |           | 27/04/   | 23.                                | Structure of proteins   |         |
|      | atoper    | 07/10/   |                                    | Qualitative and biological role of proteins and amino acid  |         |
|      |           | 09/10,   | h3.                                | Disease related to malnutrition of proteins   |         |
| 4    |           | 16/10/   | 23. Lipids                         | Definition, classification with example, structure and properties of triglyceride                                     |         |
|      |           | 22/10    | 23 Fatty<br>classification         | Based on chemical and nutritional requirements with example   |         |
|      | November  | 18/11/   | 23.                                | Structure and function of<br>cholesterol in the body  |         |
|      |           | 22/11/2  |                                    | Types, composition and function in the body   |         |
|      |           | 25/11/   |                                    | Qualitative test and function of<br>lipids  |         |
|      |           | 29/11/   | 23                                 | Test  |         |
| 5    |           |          | Nucleic acid                       | Definition, purine and pyrimidine bases   |         |
|      |           |          |                                    | Components of nucleosides<br>and nucleotides with examples  |         |

|     |  | Structure of DNA  |   |
|-----|--|---|---|
